

ORLANDO · KISSIMMEE · DAVENPORT · WINDERMERE · WINTER PARK

LED screens, installed the right way

Indoor and outdoor LED screens and video walls for homes and businesses across Central Florida. We size the screen for the room, pick the mount for the wall, and install it with the cabling out of sight.

Where we install

Living rooms & home theaters

Screen sized to the seating distance, wiring inside the wall.

Lanai, patio & pool

Weather-rated screens bright enough for Florida daylight.

Game rooms

The room guests photograph — built to survive the party.

Business & signage

Storefronts, menu boards, lobby video walls.

Storefront & menu board

What a quote covers

- Screen or LED panels, sized and specified
- Video processor or controller for video walls
- Installation labour and testing
- Setup of sources, app and picture settings
- Mount, anchors and any structure or frame
- Cabling, conduit and cable concealment
- Spare modules on video wall projects
- Manufacturer warranty, written in the quote

Free assessment. Call or text.

Mounting — the part most installers get wrong

Fixed / flush

Tight to the wall, cleanest look.

Full-motion

Pulls out and swivels for corners and lanais.

Floor stand

No holes in the wall — rentals, glass, stone.

Ceiling / suspended

Over a bar, a counter or an open space.

Tilt

Angles down from above a fireplace or bar.

Recessed

Built into the wall, flush with the drywall.

Mobile cart

Rolls room to room and locks in place.

Custom structure

Frames and freestanding steel for video walls.

Same resolution outside — different build

	INDOOR	OUTDOOR
Pixel pitch	P1 – P3, fine pitch	P1, P2 and P3 too, in IP-rated cabinets
Brightness	600 – 1,500 nits	5,000 – 10,000+ nits for daylight
Protection	Standard cabinet	Sealed cabinet, IP-rated for sun and rain
Typical use	Media rooms, lobbies, bars	Lanai, pool, patio, storefronts

Outdoor does not mean a coarse, low-resolution screen: we install fine pitch outside too, in sealed IP-rated cabinets. Pitch follows the viewing distance — rule of thumb, pitch in millimetres × 10 = the minimum comfortable distance in feet.

How it works

01

Assessment

Send photos of the wall or book a visit. We check surface, power, light and viewing distance.

02

Spec & quote

Screen, pitch, mount and cabling in writing, with a closed price before anything is ordered.

03

Installation

Anchors rated for your wall, cables concealed, everything tested, space left clean.

04

Handover

Sources connected, picture calibrated, remote and app set up, walkthrough done.
